SafeSub®

SafeSub® Highlights

- A safer, more secure method to transport subs
- Constructed of A-36 Steel
- 1" thick solid Lift Post from top to bottom with pad eye utilized to ensure long term viability - in contrast to a pad eye welded to the top of a basket
- Pad Eye Lift Post is virtually indestructible.
- A Solid 1" lift post will hold the weight of the entire basket and cargo and was tested to hold over 129,000 pounds
- NO Heat Affected Zone for pad eyes
- All structural members welded with Flux-Core to AWS D1.1
- Standard sizes: 3'x8'x3' - 10 subs, 4'x8'x3' - 15 subs
- Finishing Options — Painted or Galvanized
- Construction Options: Expanded metal sides or solid metal sides
- Optional polyurethane mounts to prevent damage to decks
- Design allows baskets to be stackable
- Sliding bar brace & multiple safety pin alignment positions allows for different sized subs to be held securely
- Holds subs upright — no more laying subs down; no more pinched fingers.
- Multiple pin sizes available to fit different sized subs.
- Patent pending.
